

Scheduling Services: What will happen to my scheduled visits if I edit the named time frames?

Nothing. The actual times are stored with the visits, not the names or links to the time frames.

So if you change "Morning" to mean "6:30 am-9:00 am", all visits previously set up using the Morning time frame will remain unchanged. Likewise, if you change the label "Morning" to "Early AM", no visits will be affected.
